Selecting User Roles in Blackboard

Blackboard User Roles are the set of privileges that can be assigned to user accounts. Whether we are talking about a Blackboard Course, Hub or Site, each user must be assigned a **User Role** when they are being enrolled. The assigned role controls access to the content and tools in Blackboard.

The purpose of this document is to provide the necessary information to bring a more consistent use of the different User Roles across all SLC courses, Hubs, Sites, and Programs (B.Sc.N, CICE, Program Review, etc.).

SLC User Roles Description

1. **Student:** the typical student role; can access materials as allowed by instructor; can participate in discussions, complete tests and assignments; shown in the Grade Center
2. **Instructor:** the standard faculty role; can create content, grade students and control all materials inside the HUB/SITE
3. **SLC Instructor (No Grade Access):** the standard faculty role except the instructor does not have access to the Grade Center.
4. **Enhanced Instructor:** all the permissions of Instructor and can add or remove users from the HUB/SITE. For more information on how to add or remove users, click on the link to open Adding and Removing Users in Blackboard
5. **Read Only:** all permissions of the Student except cannot complete assignments and is not shown in the Grade Center. Can post information through faculty member only.
6. **SLC Grader (Read Only):** all permissions of the Student except cannot complete assignments and is not shown in the Grade Center. Has access to Grade Center. Can post information through faculty member only. (Not yet Available)
